## ARVENTO SCHOOL BUS TRACKING SYSTEM

The School Bus Tracking System is a specially designed and developed by Arvento for companies delivering transport service for schools or institutions / schools / parents receiving such services.

**Our kids safe & visible with Arvento Kids...**

### Immediate Online Tracking

The system makes it possible for users to have an immediate and retrospective tracking and checking of the school vehicle destination within service hours. Users may track information such as the route followed by school vehicles, timetables, the exact location and timing of transport, time of delivery of passengers at school / home / work, vehicle stop locations, stopover times and locations.

If and when asked, the system will send SMS messages to the mobile phone of the person in charge / parent that the vehicles is approaching to avoid unnecessary outdoors waiting times.

### Immediate Speed Limit Control

One of the peculiarities of the system is to engage speed limitation. In case the vehicle exceeds the designated speed limit, the people in charge receive an instantaneous warning message through the system and the mobile application. This would ensure immediate intervention in case of a speed limit violation by the driver.

### Your Kids Always Visible By Arvento

The specially designed 'Arvento Kids' application allows for an immediate tracking of all movements of the school vehicles by parents, school managements and transportation companies on mobile phones and tablets.

### A Safe and Traffic-Friendly Transport Service

The system provides a safer, timely and regular service for both providers and recipients of transport services.

## PARENTS

- Can track all movements of transport vehicles immediately and retrospectively,
- Will get immediate warning messages as soon as the vehicle exceeds speed limits,
- Will be immediately informed about the time and location that their children are picked up and dropped by way of SMS messages,
- Will be immediately warned by messages when their kids don't get in the vehicle,
- Will be immediately texted about any possible delays in transport avoiding unnecessary waiting time outdoors,
- Will be informed by message as soon as the vehicle enters and exits school,
- Can inform the driver on Arvento Kids application or at <http://kids.arvento.com> if and when you kids will not take the vehicle on a given day.

## SCHOOL MANAGEMENT

- Can provide a safer and uninterrupted transport service to their students and parents,
- Can track the route, movements and speed of school vehicles immediately and retrospectively,
- Can immediately check and intervene the company / vehicle / driver if the vehicle exceeds the speed limit or makes another error,
- Can impose best sanctions to transport companies by checking complaints on the system based on numeric and accurate data,
- May check the performance of transport companies the best way possible,
- May continue education without any interruption since all vehicles will be at school on time.

## TRANSPORT COMPANIES

- Can check the route, time of departure and arrival as well as speed of their vehicles
- Can calculate total mileage and do proper route planning,
- Can easily detect driving errors,
- Can save on fuel, time and workmanship since their fuel costs and traffic fine ratios would drop thanks to speed control and safer driving,
- Can easily fulfill their commitment to the school since they will be delivering on-time services thanks to the system.
