Arvento Treyki Mini, new generation GPS tracker with low energy consumption and long operation time

If you are every day concerned about the whereabouts and safety of your loved ones and valuable assets, it is the high time to introduce you Treyki Mini People and Asset Tracking System. You can have 7/24 tracking anywhere with Internet connection and reach to any person you want in the shortest time in any case of emergency.

YOUR LOVED ONES AND VALUABLES ARE IN YOUR SIGHT

Treyki Mini New Generation Tracking System can be used:

- for tracking high-risk patients, e.g. Alzheimer's patients,
- for the safety and tracking of children,
- for the safety and tracking of the disabled,
- during search and rescue operations,
- for the safety and tracking of outdoor sports activities,
- for tracking and control of pets,
- for tracking and control of valuables and assets,
- for tracking of field teams and operations.

8 DIFFERENT OPERATING MODES

Treyki Mini, offering a multi-purpose use with its 8 different operating modes, which is not available in other tracking devices, makes your life easier anywhere under any condition.
